

## **The Moorish Hall - the spirit of the 19th century**

The Moorish Hall is a magnificent piece of 19th century architectural history on Lake Constance. This example of the architectural spirit of the time was completed in 1887. For many decades, the wealthy citizens of Constance celebrated their grand balls and festivities in the oriental ambience of the hall. The Stuttgart architect Prof. Otto Tafel is credited with designing the ballroom with its characteristic mirrored wall. The three large mirrors in particular - each measuring an impressive 2 meters wide and 4.5 meters high - are highlighted as a defining feature of the hall. In their day, these were the largest mirrors in Europe and were imported by rail from Russia.

Prof. Otto Tafel incorporated many elements of classical Moorish architecture into this hall. The three large mirrors - directly opposite the main entrance - are located in large round arches supported by columns. They make the hall, which is around 6 meters high, appear truly mighty. On the sides and between the mirrors are niches with gold-clad, horseshoe-shaped arches. A multitude of small fan-shaped arches form the transition from the walls to the ceiling, along the edge of which runs a wide floral band with floral patterns. The central star motifs on the ceiling are formed by red ornamental bands, framing the stylized tendril ornaments (arabesques). Two 18-light chandeliers hang from the ceiling, no doubt once fitted with wax candles.

The predominant colors are beige as a background, red and blue for the ornaments. And, of course, plenty of real gold leaf for the visual highlights of the ceiling. True to the Moorish model, architect Tafel adhered to the principle that even the smallest surfaces in the interior of oriental buildings are decorated with recurring ornaments. This delight in surface-filling patterns has its origins in the Islamic faith, which - in contrast to Christianity - does not permit figurative representations of its deity. The multitude of ornaments is intended to distract the viewer from their own figurative ideas. Tafel deviates from the Moorish originals in only one essential point.

As the Moorish Hall was not a religious site, the architect dispensed with the typical calligraphic elements, which reproduce verses from the Koran in the form of scrolls. Such a stylistic element can only be found above the entrance door. It consists of four words that make up the meaning "in worship of Lord Abii Abdullah".
